TechCommand OS

Role-based video production kit

Five complete narrated walkthroughs for partner meetings, onboarding, training, and implementation.

PRODUCTION RULES

- Use only the isolated fictional demo workspace.
- Keep DEMONSTRATION DATA ONLY visible in every recorded interface.
- Do not claim live integrations unless their credentials and test results are verified.
- Use a calm, confident, instructional voice at approximately 140 words per minute.
- Add captions and export 1080p MP4 plus a caption file.

1. Executive partner overview

Target duration: 2:00
Audience: Partner executives and sourcing leaders

Time	On-screen action	Narration
0:00-0:15	Title and shared-workflow animation	Every service request should have one accountable path from authorization to paymen

Recording checklist

- Reset the demo workspace before each recording.
- Confirm every visible record is fictional.
- Hide browser bookmarks, personal notifications, and account details.
- Record desktop at 1920 x 1080; record mobile technician flow separately.
- Use a human pronunciation review for TechFlex, TechCommand, SpinLife, Invacare, BMET, QA, and CEU.
- Add approved logo, disclosure, captions, music license, and final CTA.
- Review every frame for real names, emails, work orders, serials, pricing, and API credentials before release.

Delivery set

Asset	Format
Full narrated videos	1080p MP4
Silent screen captures	1080p MP4
